This Google Doc is rather long, and consists of every TERF and general transphobe I have ever come across, and blocked, in my over 6 years invested in this miserable, miserable hellsite. It also has some TERF/transphobe dogwhistles that I've learned over time, and tags used by transphobes to block. This way, you'll be able to spot transphobes in the wild, and block them on your own time, too.

Dogwhistles

Dogwhistles: "the use of subtle, coded language in political messaging that only a particular group will understand."

- Anti-porn and anti-sex work rhetoric
- Labeling themselves as a "febfem" / "female-exclusive bisexual female"
- Using "rad", "radical", "fem", "misandry" / "misandrist", "RF", and what is considered 'female' anatomy (such as uteri) in URLs
- Using the phrase "adult human female"
- Using "troon", "TRAs", "GCs", "gendies" and "genderists" to refer to transgender people
- Calling themselves "gender critical"
- Saying 'TERF', 'cis' or 'bitch' are slurs
- Having a particular interest in Andrea Dworkin, Adrienne Rich, Sheila Jeffreys, Catharine MacKinnon, Shulamith Firestone, Germaine Greer, Gloria Steinem, Valerie Solanas, Julie Bindel, and / or Ti-Grace Atkinson
- Using the words and phrases "wombyn", "womyn", "natal women" and "women-born-women" to refer to cisgender women
- Using the phrase "lesbian, not queer"
- Saying "LGB", instead of "LGBT"
- Using the acronyms "TIM" (transgender-identified male) and "TIF" (transgender-identified female)
- Using the phrase "dysphoric female" (*almost* exclusively TERFs)
- Talking about "male invaders" in "women's spaces"
- Using the phrases "men can't be women," "sex is real", "men can't be lesbians", and similar sentiments
- Drawing a lot of attention to chromosomes
- Calls transgender women rapists and / or compares a gay or lesbian person having sex with a transgender person of their preferred gender to conversion therapy
- Claims radfems are only hated because they're women
- Seems to use 'lesbian' to mean 'TERF'

Tags to block

Be sure to block **both** versions of a tag with multiple words: the version of the tag with spaces, and the version of the tag without the spaces. For example, block **both** '#gender crit' and '#gendercrit'.

Shinigami Eyes

This extension is available for [Chrome](#) and for [Firefox](#). This extension marks trans-friendly links as green, and anti-trans links as red. **Tumblr users are able to be marked as anti-trans**, which makes it so that you can spot transphobes on tumblr at a glance, and block them with ease.

Blocklist

If you're interested in a Doc of even *more* transphobes to block, I recommend checking this one out: [☰ TERF Blocklist!!](#)

Without further ado, here's the list.
